## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement filed September 13, 2002 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it does not contain English translations, English abstracts, a search report or a listing of the relevance of references EP 995668, EP 1084816 or FR 2029994. These references have been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

### ***Drawings***

2. The formal drawings were received on June 26, 2002. These drawings are acceptable.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1772

4. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "liquid crystalline polymers" in claim 4 is unclear which renders the claim vague and indefinite. From the specification it appears that the plastic surface is in a solid state, not a liquid state. Therefore, it is unclear what type of polymers Applicant is claiming when referring to "liquid crystalline polymers." Since most polymers exhibit a crystalline structure, for purposes of examination the phrase is assumed to refer to any polymer that is not specifically amorphous. Furthermore, for purposes of examination it is assumed that the plastic surface is in a solid state in the final product.

Claim 5 is unclear is scope which renders it vague and indefinite. Claim 5 recites "wherein said fastening means further comprises one or more apertures formed therethrough." It is unclear what "therethrough" is referring to, i.e. the plastic or metal surfaces, the head portion or the neck portion.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Carper et al. (EP 0322999 A2).

Art Unit: 1772

Carper discloses a heat riveting rubber comprising a rubber layer (plastic surface) and a metal layer (metal surface). The rubber layer comprises a plurality of rubber posts (fastening means/neck portions/ ribs) with the distal end including a retaining lip (fastening means/head portion). The rubber posts attach to the metal layer via apertures (fastening means) in the metal layer. The rubber material is an ethylene-propylene type elastomer. See column 3, line 4 to column 4, 27 and figures 5 and 6.
